## The Value of Investments at Risk – \$20,000 to \$40,000 Minimum

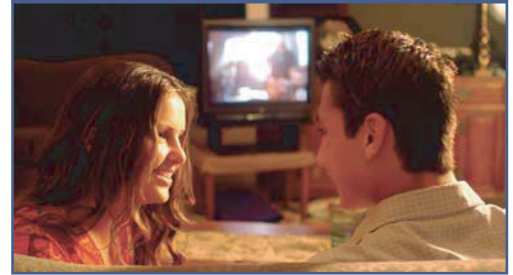

### Electrical

### Telecom

### Cable

Computer/Office Equipment • Entertainment System • Security System • Appliances • Heating & Cooling • Lighting Control  
Sprinkler Systems • Electrical Wiring System • Telephone • Fax Machine • Cable Modem • Plasma TV/VCR

## Benefits of a Total Home Surge Protection System™

- Install surge protection during the construction phase & maximize the benefits when you move in to your new home.
- Cost of this high value option can be included in your home purchase price, adding as little as \$8.00 to your monthly mortgage payment.
- Controlling your insurance costs by avoiding the risk of claims, disputes and cancellations caused by repeat surge damages.
- Extend equipment life and improve reliability to all electrical equipment.
- ☀️ Lifetime free replacement warranty on all surge protection equipment.

## Emotional Risks – Priceless

- Lost data on computer equipment.
- Minimize the cost of repairs & inconvenience of equipment replacement, caused by devastating power surges.
- Increase the security and safety of your family by ensuring the continued reliability of appliances, telephones, computers and security systems when you need them most.
- Peace of mind!

**Normal Life of Equipment**  
Collective Cost/Year = \$4,600

**\$\$ You Save \$2,300 \$\$**

**Extended Life of Equipment**  
Collective Cost/Year = \$2,300

## Normal Life

No Protection/Status Quo: Relying only on Standard Manufacturer Warranty (3 months to 1 year typical). Expect shortened electrical equipment life with higher maintenance and repair costs.

## Unfiltered Protection

Protects against outside utility-based high energy surges. Does very little, if anything, for internally generated surges and spikes which comprise over 85% of everything that happens. This protection is typically a plug-in device used for electronic equipment only.

## Filtered Protection

The **Ultimate Total Home Surge Protection System** with an enhanced filtering system protects with at least 50% more energy handling against the external surges and spikes, and protects with an enhanced filter the 85% internally generated surges and spikes. Expect to double the life and reliability of all your equipment. Dramatically reduces the possibility of maintenance and repair. Therefore, **expect to reduce your cost of ownership by 50% on a yearly basis.**
